ZIMMER+ROHDE

Product data sheet

AERO NEW FR follows our successful best-seller AERO. A superfine lino warp combined with the thinnest weft threads in Trevira CS makes this highly transparent, feather-light quality possible. A subtle strié gives the 20 colorways of AERO NEW FR a soft elegant shimmer. Like its predecessor, AERO NEW FR captivates with its light drape and offers both the obligatory natural shades and exciting color nuances.
