ZIMMER+ROHDE

Product data sheet

NOVEL RE FR radiates a natural subtlety and at the same time surprises with its thoroughly technical composition. A high-quality yarn in warp and weft consisting of 50% recycled polyester was developed for a special dyeing process. In this process, two components are charged in opposite directions and thus attract the dyes to the yarn differently. The result is the beautiful mélange in the 15 colorways of the NOVEL RE FR open weave.
