Hodsoll McKenzie

Cuscus

Product data sheet

A loose collection of different colored plain-weave threads, seemingly held together by the dense pile of the wool. The feel is so supple that at first you think of a blanket or a throw. But as a window treatment, the voluminous fabric will transform any interior into a cozy haven. The Talaud bear cuscus could only wish for this kind of place. Its habitat is 4000 hectares of primary forest on the Talaud island of Salibabu. But the animal is under threat from hunting and habitat reduction.
