

ZIMMER+ROHDE

## Product data sheet

This dense and heavy linen has an almost aristocratic feel, being of the highest quality and designed to age well. Made in an emission-free zero-waste weaving mill, OKAPI is double-sided. The reverse side reveals the reason why this decorative cover fabric is named after the forest giraffe. A striking zigzag is reminiscent of the okapi's moving rear with its distinctive markings. It's just a shame that there are so few of them left in the world.

Hodsoll McKenzie

### Okapi
