ZIMMER+ROHDE

Product data sheet

When thousands upon thousands of monarch butterflies congregate in Mexico to overwinter, it’s a breathtaking sight. The oscillating movement of their wings, as these migratory butterflies hang in colonies in the trees, with their black and white markings on a warm orange background, truly are a work of art, as well as being a vital part of the entire ecosystem. Reason enough to dedicate probably the most extraordinary item in this collection to this natural phenomenon. A jacquard velour made of certified organic cotton recreates the butterfly colonies in such a sophisticated way that it will turn every piece of furniture into a work of art.
