ZIMMER+ROHDE

Product data sheet

The extraordinary textile dyeing skills of the fashion designer Fortuny, who became famous for his special color nuances and his fabrics stamped with gold and silver, were the inspiration for this highly decorative jacquard fabric.

The special finish and the artisanal dyeing technique provide GIARDINO D'IVERNO with its refined three-dimensional effect. The elegance of this softly falling and impressive decorative material is also emphasized by the shimmering matt-gloss effect.

GIARDINI D'IVERNO is an environmentally-friendly product made in northern Italy in an artisanal weaving mill.
