ZIMMER+ROHDE

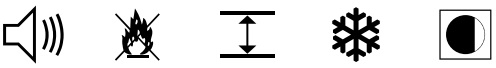

Product data sheet

OVERNIGHT FR impresses first and foremost with its silky sheen and soft flowing drape.
The elegantly tactile and graphic jacquard texture can be optimally integrated into the most diverse room concepts. Due to the deliberate double-sided construction of the fabric, there is no reverse side, only an additional choice – one side a little lighter, the other darker. That means that the densely woven blackout fabric can be used not only directly at the window, but can also serve as an excellent room divider, which also benefits the room acoustics.
Made of 100% flame retardant Trevira CS, OVERNIGHT FR is equally suited to private or public spaces.
