

ZIMMER+ROHDE

Product data sheet

Stream boasts a special three-dimensional effect created through deep embossing on vinyl. This first step of this technique involves pressing the vinyl surface with four rollers that create colours as well as shading. The material is then precisely embossed with a premium embossing roller - heat and pressure are applied to create an illusion of depth. Stream features horizontal lines with an organic look and fine dotting that lends the material a special handcrafted appearance.
