

ZIMMER+ROHDE

Product data sheet

A hand-painted design on a coarse canvas provided the template for this exclusive wallpaper. Innovative manufacturing processes and materials make it possible to realise the complexity of an authentic design using modern techniques. Silver or gold pigments lie on the surface of Boreal like a fine metal dust. The wallpaper gets its tactile patina from a transparent printing paste that gains volume from being heated during the manufacturing process. The metallic effect absorbed by the horizontal stripes makes Boreal a stand out design to offering style to any room.
