

ZIMMER+ROHDE

Product data sheet

As we all know, opposites attract. This is especially clear when the two superb natural materials – linen and silk – come together. Woven in harmony, the result is a beguiling and softly flowing satin fabric. PALLADIUM is undoubtedly one of our favorite products in our collection. The silky shimmer on the front, combined with the natural irregularity of the finely spun linen yarn on the reverse, lends sensuality and casual elegance to any interior.

With a dreamy, soft color palette.

PALLADIUM consists of 60% certified European linen (European Flax Certification) made by a family-run business in the northwest of Italy under outstanding production conditions.
