

ZIMMER+ROHDE

Product data sheet

AU CRÉPUSCULE attests to the love of the Etamine brand for colour. It is inspired by the harmonies of fauvism, a period of experimentation with light and colour in painting. Paul Gauguin, Georges Braque, Paul Signac and Henri Matisse all dreamt of the south of France as the land of inspiration. Digitally printed on extra-broad fabric, AU CRÉPUSCULE is intended to be used as panels. In harmony: the upper part, in petal white, reminds us of sunlight, and the lower part suggests the twilight over the blue Mediterranean Sea and on the ochre and terracotta countryside of Provence.
